NFL Week 5 graded

Engine graded with nfl_cfbmethod/grade.py, framework with results/grade_picks.py. All times Phoenix. No betting lines go into either model.

6-5-1	9-2-1	4-1
Engine (official picks)	Framework (your Prompt Football)	Framework on the 5 games where they split

Kickoff	Game	Final	Engine pick		Framework pick	
Sun 6:30 AM	Eagles at Jaguars (neutral site)	Eagles 17, Jaguars 19	Jaguars 74%	Win	Jaguars 85%	Win
Sun 10:00 AM	Bears at Packers	Bears 7, Packers 31	No pick (both): Caleb Williams questionable; Tyson Bagent starts			
Sun 10:00 AM	Bengals at Dolphins	Bengals 31, Dolphins 24	Bengals 74%	Win	Bengals 69%	Win
Sun 10:00 AM	Browns at Jets	Browns 12, Jets 17	Jets 56%	Win	Jets 57%	Win
Sun 10:00 AM	Colts at Steelers	Colts 22, Steelers 34	Colts 58%	Loss	Steelers 60%	Win
Sun 10:00 AM	Giants at Commanders	Giants 27, Commanders 27	Commanders 56%	Tie	Commanders 63%	Tie
Sun 10:00 AM	Raiders at Patriots	Raiders 17, Patriots 45	Patriots 70%	Win	Raiders 64%	Loss
Sun 10:00 AM	Texans at Titans	Texans 26, Titans 3	Texans 64%	Win	Texans 53%	Win
Sun 10:00 AM	Vikings at Saints	Vikings 23, Saints 13	Vikings 59%	Win	Vikings 76%	Win
Sun 1:05 PM	Broncos at Chargers	Broncos 23, Chargers 17	Chargers 56%	Loss	Broncos 55%	Win
Sun 1:25 PM	49ers at Seahawks	49ers 32, Seahawks 29	Seahawks 56%	Loss	49ers 57%	Win
Sun 1:25 PM	Lions at Cardinals	Lions 45, Cardinals 21	Cardinals 59%	Loss	Lions 56%	Win
Sun 5:20 PM	Ravens at Falcons	Ravens 30, Falcons 23	No pick (both): Lamar Jackson ruled out; Tyler Huntley starts			
Mon 5:15 PM	Bills at Rams	Bills 37, Rams 34	Rams 75%	Loss	Rams 53%	Loss

Amber rows: the two models picked different teams. A tie is graded as a tie. Percentages are each model's win chance for its pick.

Against the betting market (grading only, never an input). The closing-line favorite went 9-2-1 on the engine's 12 graded games. Accuracy of the win chances (Brier, lower is better): engine 0.215, closing line 0.157. The engine picked against the market favorite 3 times and went 0-3.

Your team notes: how they're doing

Notes you set by hand, case by case. A note moves the team's predicted margin by its points in both models, for games kicking off after you set it, and runs out 3 weeks after your last read on that team unless you renew it. In force now: Bills: max effort +1.5; Rams: unreliable -3.0 points.

Team	Your note	Compared with	Graded games	Team record	Model alone expected	Points per game vs model alone	Win chances, Brier (with / without note)	Picks the note changed	So far
Rams	Unreliable -3.0 since Oct 12; 1 read; expires Nov 2 unless renewed	Engine	0	No graded games yet					
		Framework	0	No graded games yet					
Bills	Max effort +1.5 since Oct 12; 1 read; expires Nov 2 unless renewed	Engine	0	No graded games yet					
		Framework	0	No graded games yet					

Every graded pick that involved a noted team. **Model alone expected**: the wins the model predicted without your note. **Points per game vs model alone**: how much better (+) or worse (-) the team did than the model's predicted margin; an unreliable note is right when this is negative and a max-effort note when it's positive, ideally by about the note's points. **Brier**: how close the win chances were to what happened, lower is better. **Luck**: how far results land from the model's expectation by chance alone 95% of the time over that many games; until a number gets outside it, one good or bad stretch can't prove a note either way.

Engine: the locked college method (NFL: with the approved NFL settings), rating every offense and defense on EPA and success rate, adjusted for opponents. Framework: your Prompt Football criteria (trenches 25%, net efficiency 25%, passing 20%, situational 15%, high leverage 15%) scored from this season's play-by-play only. Team notes (NFL): your own calls, set by hand and added on top of both models' numbers. Files: results/ in the sports-engines repo.
