Catch-up report, Thursday Oct 15

Usage ran out this week, so Tuesday's run and Wednesday's check didn't happen. Everything they would have done is done now, and the QBs were checked against the latest news. All times Phoenix.

2-0	2-0	9 of 9	3
Engine, Tuesday and Wednesday college	Framework, same games	Sunday NFL picks the two models agree on	NFL games waiting on a starting QB

Caught up

• **NFL Week 6:** both models re-run this morning with Week 5's Monday game included (Bills 37, Rams 34). The engine's picks didn't change. The framework switched two coin flips, Jets to Patriots and Seahawks to Broncos, so tonight's Seahawks at Broncos is the only game where they disagree.
• **College, Tuesday and Wednesday:** graded. Jacksonville State beat FIU 27-24 and Missouri State beat Kennesaw State 24-21. Both models were right on both.
• **QB checks:** NFL from the official practice reports through Wednesday; college for Thursday's and Friday's games. No college pick changed.

Worth knowing

• **Missouri State** won with Henry Belin at QB. He had replaced Skyler Locklear during their Oct 8 game. The Wednesday QB check that would have looked at this was one of the missed runs, so the pick stood as logged. It's noted in the log, not changed after the result.
• **Colorado State** keeps its pick: K'saan Farrar makes his third straight start while Hauss Hejny (hamstring) is out, the same call as Sunday night.
• **Washington at Purdue** stays a no-pick: Demond Williams Jr. is unlikely to play, and Elijah Brown is expected to start.

No pick in either model until Friday's official statuses

• Bears at Falcons: Caleb Williams (hamstring) isn't confirmed. Full at Wednesday's walkthrough; his coach says it'll be close.
• Ravens at Browns: Lamar Jackson (ankle) didn't practice Wednesday.
• Steelers at Buccaneers: Baker Mayfield (thumb) didn't practice Wednesday; Jalon Daniels started the last two.

Coming up

• Thu 3:48 PM: regular check, tonight's Seahawks-Broncos inactives and today's college QBs.
• Fri 1:40 PM: Friday lock, set up in this chat. Settles the three QBs above, refreshes both NFL models and sends a new PDF.
• Sat 6:40 AM: Saturday college run (52 games). Sun 8:40 AM and Mon 3:47 PM: game-day QB checks.

The pages that follow are the standard report pages: Tuesday and Wednesday college results, NFL Week 6 picks with your team notes applied, Thursday and Friday college picks, and the team notes scorecard.

College football graded (2026-10-13 to 2026-10-14)

Both models graded with results/grade_picks.py. All times Phoenix.

2-0	2-0	0-0
Engine (official picks)	Framework (your Prompt Football)	Framework on the 0 games where they split

Kickoff	Game	Final	Engine pick		Framework pick	
Tue 4:00 PM	Delaware at Middle Tennessee	Delaware 30, Middle Tennessee 33	No pick (both): QB changed last game (EJ Archield Jr. started; Nick Minicucci started 3 of 5); starter not yet named			
Tue 5:00 PM	Florida International at Jacksonville State	Florida International 24, Jacksonville State 27	Jacksonville State 63%	**Win**	Jacksonville State 51%	**Win**
Wed 4:30 PM	Kennesaw State at Missouri State	Kennesaw State 21, Missouri State 24	Missouri State 54%	**Win**	Missouri State 60%	**Win**
Wed 5:00 PM	Western Kentucky at Sam Houston	Western Kentucky 16, Sam Houston 3	No pick (both): QB changed last game (Brock Glenn started; Rodney Tisdale Jr. leads in attempts); starter not yet named			

Amber rows: the two models picked different teams. A tie is graded as a tie. Percentages are each model's win chance for its pick.

NFL Week 6 picks

Engine (official) and framework side by side. All times Phoenix. No betting lines, records or narrative go into either model; your team notes are added on top.

Kickoff	Game	Engine (official)	Framework	Framework score	
Thu 5:15 PM	Seahawks at Broncos	Seahawks 53%	Broncos 51%	Broncos 22 - Seahawks 21	**Split**
Sun 6:30 AM	Texans at Jaguars (neutral site)	Jaguars 56%	**Jaguars 72%**	Jaguars 27 - Texans 20	Agree
Sun 10:00 AM	Bears at Falcons	No pick (both): Caleb Williams (hamstring) Week 6 status unconfirmed: full in Wed estimated practice report, coach says it will be close			
Sun 10:00 AM	Jets at Patriots	Patriots 67%	Patriots 53%	Patriots 24 - Jets 23	Agree
Sun 10:00 AM	Panthers at Eagles	Panthers 58%	Panthers 62%	Panthers 26 - Eagles 22	Agree
Sun 10:00 AM	Ravens at Browns	No pick (both): Lamar Jackson (ankle) Week 6 status unconfirmed: did not practice Wed			
Sun 10:00 AM	Saints at Giants	Giants 60%	Giants 62%	Giants 25 - Saints 22	Agree
Sun 10:00 AM	Steelers at Buccaneers	No pick (both): Baker Mayfield (thumb) did not practice Wed; return unconfirmed (Jalon Daniels started the last 2)			
Sun 10:00 AM	Titans at Colts	**Colts 72%**	Colts 58%	Colts 24 - Titans 22	Agree
Sun 1:05 PM	Cardinals at Rams*	Rams 67% Rams: unreliable -3.0; model alone Rams 75%	Rams 67% Rams: unreliable -3.0; model alone Rams 75%	Rams 27 - Cardinals 21	Agree
Sun 1:25 PM	Bills* at Raiders	**Bills 71%** Bills: max effort +1.5; model alone Bills 67%	Bills 64% Bills: max effort +1.5; model alone Bills 60%	Bills 28 - Raiders 23	Agree
Sun 1:25 PM	Chargers at Chiefs	Chiefs 61%	**Chiefs 80%**	Chiefs 27 - Chargers 17	Agree
Sun 5:20 PM	Cowboys at Packers	Packers 58%	Packers 56%	Packers 26 - Cowboys 24	Agree
Mon 5:15 PM	Commanders at 49ers	**49ers 83%**	**49ers 79%**	49ers 29 - Commanders 19	Agree

They agree on 10 of 11 picks (green) and split on 1 (amber). Bold = 70%+. Grey = no pick. QBs: each team's expected starter; a game is a no-pick when the starting QB is out or unconfirmed, and any pick whose starting QB changes before kickoff is dropped. *** Your team notes:** Bills: max effort +1.5; Rams: unreliable -3.0 points. A note moves that team's predicted margin by its points in both models; official picks include it, and the small line under a pick shows each model alone.

How far to trust them (NFL, same 887 games, 2022-2025). Engine 64.0% of winners, framework 62.6%, closing-line favorite 68.7%. One week is a small sample.

College football picks (2026-10-15 to 2026-10-16)

Engine (official) and framework side by side. All times Phoenix.

Kickoff	Game	Engine (official)	Framework	Framework score	
Thu 4:30 PM	East Carolina at UAB	East Carolina 59%	**East Carolina 77%**	East Carolina 31 - UAB 19	Agree
Thu 4:30 PM	Georgia Southern at Old Dominion	**Georgia Southern 75%**	**Georgia Southern 85%**	Georgia Southern 33 - Old Dominion 15	Agree
Thu 5:00 PM	Colorado State at Texas State	**Texas State 83%**	Texas State 70%	Texas State 36 - Colorado State 28	Agree
Fri 4:30 PM	Memphis at Tulane	**Memphis 73%**	**Memphis 86%**	Memphis 39 - Tulane 21	Agree
Fri 5:00 PM	App State at Coastal Carolina	Coastal Carolina 58%	App State 65%	App State 29 - Coastal Carolina 23	**Split**
Fri 5:00 PM	Washington at Purdue	No pick (both): Demond Williams Jr. hurt in last game, unlikely to play (coach Jedd Fisch, Oct 12); Elijah Brown expected to start			

They agree on 4 of 5 picks (green) and split on 1 (amber). Bold = 70%+. Grey = no pick. No pick: the starting QB is out or unconfirmed, or a team lacks enough play-by-play this season.

How far to trust them (college, same games). 2025: 580 games, engine 70.9%, framework 67.9%; 2026: 142 games, engine 67.6%, framework 65.5%.

Your team notes: how they're doing

Notes you set by hand, case by case. A note moves the team's predicted margin by its points in both models, for games kicking off after you set it, and runs out 3 weeks after your last read on that team unless you renew it. In force now: Bills: max effort +1.5; Rams: unreliable -3.0 points.

Team	Your note	Compared with	Graded games	Team record	Model alone expected	Points per game vs model alone	Win chances, Brier (with / without note)	Picks the note changed	So far
Rams	Unreliable -3.0 since Oct 12; 1 read; expires Nov 2 unless renewed	Engine	0	No graded games yet					
		Framework	0	No graded games yet					
Bills	Max effort +1.5 since Oct 12; 1 read; expires Nov 2 unless renewed	Engine	0	No graded games yet					
		Framework	0	No graded games yet					

Every graded pick that involved a noted team. **Model alone expected**: the wins the model predicted without your note. **Points per game vs model alone**: how much better (+) or worse (-) the team did than the model's predicted margin; an unreliable note is right when this is negative and a max-effort note when it's positive, ideally by about the note's points. **Brier**: how close the win chances were to what happened, lower is better. **Luck**: how far results land from the model's expectation by chance alone 95% of the time over that many games; until a number gets outside it, one good or bad stretch can't prove a note either way.

Engine: the locked college method (NFL: with the approved NFL settings), rating every offense and defense on EPA and success rate, adjusted for opponents. Framework: your Prompt Football criteria (trenches 25%, net efficiency 25%, passing 20%, situational 15%, high leverage 15%) scored from this season's play-by-play only. Team notes (NFL): your own calls, set by hand and added on top of both models' numbers. Files: results/ in the sports-engines repo.
